SPEED

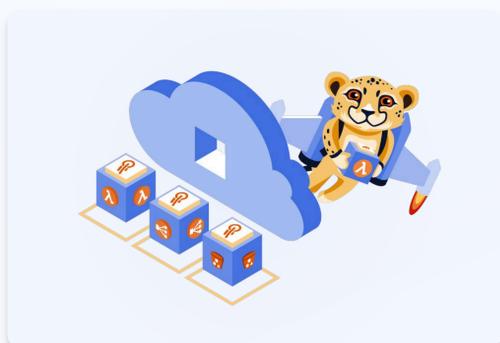

Build smarter on AWS

Pre-built infrastructure that gets your team shipping faster

- Deploy in days, not months:** Pre-built components gets your apps live quickly
- No expert required:** Intuitive patterns let any developer ship safely
- Smarter by default:** Offload more to AWS to reduce your team's overhead

"We saw AWS as a technical trick before Rocketleap. Now it's a business enabler. We can ship features and enter new markets faster."

JO Jurgen Onland
Technical Lead,
Goudappel

SECURITY

AWS best practices made simple

A secure, scalable AWS setup without enterprise complexity

- Cost control:** Built-in monitoring and guardrails to prevent unexpected spikes
- Security automation:** Best-practice controls that protect your environment
- Easy compliance:** Automatic checks and reporting to meet certification criteria

"Rocketleap's pre-configured building blocks made it significantly easier for our developers to implement services quickly."

TB Thomas Bakker
CTO, Momo
Medical

PARTNERSHIP

A partner that grows with you

Experience AWS expertise that feels like part of your team.

- Help when you need it:** Expert guidance as your AWS needs change
- Stronger dev skills:** We coach your team to use AWS with confidence.
- Always up-to-date:** Continuous improvements and platform upgrades included

"Rocketleap helped me grow as a developer. It made AWS more accessible and helped me level up faster."

MB Matthijs Boot
Engineering Manager,
Goudappel

START WITH A QUICKSCAN

QuickScan is a 2-day review of your AWS setup, with fixes applied

You end the QuickScan with a faster, safer, more cost-efficient AWS setup. Not another report gathering dust.
